

Rhenus Air & Ocean

Sustainability Highlights 2023

In this Sustainability Highlights report, we showcase the progress of Rhenus Air & Ocean in 2023, focusing on our sustainability achievements, the impactful initiatives across our division, and the innovative solutions we've implemented to drive positive change and support our customers' sustainability goals.

Rhenus Air & Ocean strives to operate with sustainability in mind, focusing on the environment, people, and solutions, guided by six relevant Sustainable Development Goals (SDGs).

 <h3>People</h3> <p>Improving the wellbeing and equality of our people.</p>	 <h3>Environment</h3> <p>Tracking and reducing our carbon footprint.</p>	 <h3>Solutions</h3> <p>Providing sustainable solutions to our customers.</p>
--	--	---

879k tCO₂e

of emissions generated within our value chain are collected and calculated annually in accordance with the GHG Protocol.

The emissions data cover

51

territories worldwide where we have physical offices.

Our data is internally reviewed and validated against the 4Cs—

- Coverage
- Completeness
- Correctness
- Consistency

—and externally audited in accordance with ISO 14064-1:2018.

ISO 14064-1:2018 - Specification with guidance at the organization level for quantification and reporting of GHG emissions and removals.

EcoVadis has awarded the Rhenus Group a **Gold Rating** for our commitment to environmental, social, and ethical practices in line with international standards. In 2023, we secured a position in the

Top 1%

of logistics sector suppliers evaluated by EcoVadis.

Sustainable Workplace:

campaigns are being implemented across our locations to foster environmental awareness and ensure a safe working environment for our employees.

200+

laptops and IT equipment were donated to support educational initiatives globally.

The Code of Conduct ensures legally sound practices, reflecting our commitment to

integrity, human rights, and proper working conditions.

We firmly reject any association with child labor.

Rhenus Air & Ocean is the partner of choice for innovative, lower-emission transportation solutions that seamlessly blend sustainability with efficiency. We offer a three-step approach to help minimize environmental impact and make a positive difference in the world.

Step 1 Measure

Emission Dashboard

Track CO2 emissions from the main haul of air freight and ocean freight transport.

Step 2 Optimize

Transport Mode Optimizer

Identify transportation options with lower emissions before selecting the final mode(s).

Step 3 Inset

Sustainable Marine & Aviation Fuels

Reduce transport emissions with sustainable marine fuels or sustainable aviation fuels.

RHEGREEN

Select a more CO2-efficient aircraft to lower the emission of your air freight cargo.
